## EDUCATION

### Flinders University

*Bachelor of Computer Science*

Adelaide, SA

*Feb 2023 – Current*

### Westminster School

Adelaide, SA

*Sep 2010 – Sep 2022*

## EXPERIENCE

### Front End Developer/ Designer

September 2022 – Present

*First Choice Flowers*

*Adelaide, SA*

- Assisted in the creation of First Choice Flowers' website front end, designing banners, buttons, and contact links.
- Collaborated with the CEO to develop the overall website design.
- Created mockup websites using Adobe Photoshop and Figma to refine designs before finalizing.

### Roofing Apprentice

Sep 2022 – Sep 2024

*Custom Sheet Metal Construction (CSMC)*

*Adelaide, SA*

- Delivered materials and tools to roofers on-site while assisting with material prep and cutting metal sheets to the correct size.
- Ensured the worksite remained clean and organized to support a smooth workflow.
- Developed strong problem-solving skills, attention to detail, and practical abilities to improve efficiency on-site.

### Warehouse Organiser, Test Tagger for Lighting and Sound

Jan 2023 – Dec 2023

*Andy J Sound*

*Adelaide, SA*

- Assisted visual and audio technicians in setting up lighting and sound for large-scale events.
- Managed warehouse organization, overseeing the flow of incoming and outgoing stock.
- Worked as a test tagger, ensuring products were fully functional and safe before dispatching to worksites.
- Collaborated effectively within teams to ensure smooth event operations and timely setups

## PROJECTS

### Xllebr Clothing | *HTML, CSS, JavaScript, Jira, GitHub*

June 2024 – Present

- Co-created Xllebr, collaborating with front-end developers using GitHub for version control.
- Managed tasks, set deadlines, and allocated budgets as a team leader using Jira.
- Contributed as a front-end developer, designing responsive UI/UX, optimizing user interactions, and conducting usability testing.
- Led efforts to ensure seamless collaboration and efficient project delivery within the team.

### Stock Market Tracker | *Golang, Terminal, Visual Studio Code, GitHub, PostgreSQL*

Jan 2025 – Feb 2025

- Built a real time stock tracker using go and fiber, integrating Alpha Vantage API for live data.
- Designed a PostgreSQL database to store and analyze historical stock prices.
- Optimized performance with goroutines for concurrent data fetching.
- Developed a CLI and REST API for stock retrieval.
