- RStudios

TRANSFERABLE SKILLS

- Hard Working
- Goal Orientated
- Team Player
- Focused
- Teachable
- Admirable Time Management

EXPERIENCE

2024 - Current

First Choice Flowers

Front End Developer

Whilst working with First Choice Flowers, I was responsible for assisting in the creation of the website's front end. This included designing banners, buttons, and contact links, as well as collaborating with the CEO to develop the overall website design. In addition, I created mockup websites using tools such as Adobe Photoshop and Figma to refine the design before finalizing the final version.

Custom Sheet Metal Construction

Contact Details:

Xllebr is a brand I co-created with colleagues, where I collaborated with front-end developers using GitHub repositories for version control. As a team leader, I managed tasks, set deadlines, and allocated budgets using Excel. I also contributed as a front-end developer, focusing on designing responsive UI/UX, optimizing user interactions, and conducting usability testing.

2020 - 2024

Custom Sheet Metal Construction (CSMC)

Apprentice

While working at CSMC, my main responsibilities included delivering materials to roofers on-site and providing them with the necessary tools. I also assisted in prepping materials, cutting metal sheets to the correct size, and ensuring the worksite remained clean and organized. During my time there, I developed strong problem-solving skills, attention to detail, and practical abilities that helped ensure efficient and smooth workflow on the site.

2022 - 2023

AJS

Warehouse Organiser, Test Tagger and Lighting and Sound set up

During my time at Andy J Sound, I assisted visual and audio technicians in setting up lighting and sound for large-scale events, collaborating within teams. I also served as a warehouse organizer, managing the flow of incoming and outgoing stock. Additionally, I worked as a test tagger, ensuring all products were fully functional and safe for use before being dispatched to worksites.

AWARDS

Goal: End of 2025

AlgoExpert

100% completion of AlgoExpert

Alongside my university studies, I have undertaken an external course relevant to Software Engineering, specifically focusing on Data Structures and Algorithms. I am actively progressing through the modules, regularly practicing problems to strengthen my understanding. By the end of 2025, I aim to complete 100% of the content available on AlgoExpert.
